

Frontend Engineer | JavaScript | React.js | Angular

+20 109 014 5286

Cairo, Egypt

Frontend Software Engineer with hands-on experience in modern web technologies including **Angular, React, TypeScript, and Tailwind CSS**. Proficient in developing **responsive, scalable, and user-friendly interfaces**, with strong expertise in **component-driven architecture, state management, and API integration**. Possess foundational backend knowledge in **Node.js, Express.js, and real-time databases (Supabase, Firebase)**, enabling a full-stack perspective in software development.

Currently working as a **Frontend Engineer at Polaris Systems**, contributing to the development of a large-scale **HR-ERP system**. Responsibilities include building reusable components, optimizing performance, ensuring responsive design, and collaborating with cross-functional teams to deliver high-quality solutions.

Passionate about **technology, problem-solving, and continuous learning**, with certifications in **Frontend Web Development and Digital Freelancing (Udacity)**, and **Web Design (NTI)**. Experienced in delivering professional and user-centric web solutions through both professional and freelance projects.

FREELANCE PROJECTS

Hurghada Vibes Tours

- **Hurghada Vibes Tour** – A tourism website showcasing a variety of trips and experiences in **Hurghada**, including **sea cruises, entertainment activities, and leisure tours** for tourists. The project highlights engaging visuals, responsive design, and user-friendly navigation to provide travelers with easy access to trip details and booking options.
- **Technologies Used:** Angular, TypeScript, HTML5, CSS3, **Tailwind CSS**, Responsive Design.

CAF SPORTS COMPANY

- **CAF SPORTS** — One of the leading companies in Egypt and the United Arab Emirates, specializing in sports construction and artificial flooring.
I developed their website using **React.js** and **Tailwind CSS**, focusing on a modern, responsive, and performance-optimized user experience.

3lamko Bus

- **3lamko Bus** — A travel agency specializing in transportation from Cairo to Sharm El Sheikh using minibuses and limousines.
In this project, I built the platform using **TypeScript, Tailwind CSS**, and **Supabase** to deliver a reliable, user-friendly booking experience with real-time data management.

Professional Experience

Frontend Engineer - Polaris Systems 09/2025 - Present

- Developing and maintaining a **Human Resources and Administrative Resource Planning (HR-ERP) system** using **Angular**.
- Building modular, scalable, and maintainable front-end components following best practices.
- Implementing **responsive UI/UX designs** to ensure seamless experience across devices.

- Collaborating with backend teams to integrate **RESTful APIs** and ensure smooth data flow.
- Optimizing application performance, debugging, and enhancing code quality.
- Working in an **Agile environment**, participating in sprint planning, code reviews, and daily stand-ups.
- Utilizing **Git** for version control and contributing to feature branches.
- Writing clean, reusable code with a focus on scalability and maintainability.

NOC Engineer - Access Network Team at Afro 02/2024 - 08/2025

- As a NOC Engineer in the Access Network Team at Huawei, I monitor and report on network performance to ensure stability and efficiency. I conduct minor troubleshooting to quickly resolve issues and collaborate with team members to optimize network operations and support seamless connectivity. I also provide detailed performance reports to drive continuous improvement.

Training Projects

[The-Holy-Quran](#)

responsive Quran web app built with React.js.

[Adventure Agency](#)

html and CSS using media query.

[Responsive Website](#)

using HTML, CSS and Bootstrap.

[Food-Resturant](#)

Not responsive, using html and CSS.

[Ticketing-System](#)

developed with React.js, tailwinds CSS.

[Crud-Angular-App](#)

CRUD application developed with Angular.js using fake Api Json file

[doctor-booking-system](#)

Built with Angular. Includes booking, dashboard, JWT auth, route guards & proxy for CORS. Uses a free public API.

[Article Analyzer \(Udacity\)](#)

developed with html ,csc , Webpack and Api

[Crud-React-App](#)

CRUD application developed with React.js

[Quiz app](#)

A quiz application with React.js, Node.js

[motiv car app](#)

developed with React.js, tailwinds CSS.

[Pull Shoes](#)

Not responsive, using html and CSS.

[First Portfolio](#)

developed with React.js, tailwinds CSS.

[Personal-Blog-\(Udacity\)](#)

developed with HTML, CSS.

[landing-page-\(Udacity\)](#)

developed with HTML, CSS.
