

Experienced NOC Engineer specializing in network stability, proactive monitoring, troubleshooting, technical support, and detailed documentation. Also a freelance Software Engineer proficient in front-end frameworks like React and Angular, and back-end technologies like Node.js and Express.js. I have experience with database systems including MongoDB, Supabase, and Firebase, and a passion for tech education through a YouTube channel.

FREELANCE PROJECTS

[CAF SPORTS COMPANY](#)

- **CAF SPORTS** — One of the leading companies in Egypt and the United Arab Emirates, specializing in sports construction and artificial flooring.
I developed their website using **React.js** and **Tailwind CSS**, focusing on a modern, responsive, and performance-optimized user experience.

[3lamko Bus](#)

- **3lamko Bus** — A travel agency specializing in transportation from Cairo to Sharm El Sheikh using minibuses and limousines.
In this project, I built the platform using **TypeScript**, **Tailwind CSS**, and **Supabase** to deliver a reliable, user-friendly booking experience with real-time data management.

Experience

NOC Engineer - Access Network Team at Afro 02/2024 – Present

- As a NOC Engineer in the Access Network Team at Huawei, I monitor and report on network performance to ensure stability and efficiency. I conduct minor troubleshooting to quickly resolve issues and collaborate with team members to optimize network operations and support seamless connectivity. I also provide detailed performance reports to drive continuous improvement.

FM Engineer at Afro 01/2023 – 01/2024

- As an FM Engineer specializing in optical fiber networks, I manage and maintain the infrastructure essential for their operation. My responsibilities include maintenance, fault management, capacity planning, upgrades, documentation, compliance, and emergency response, ensuring the reliability and performance of optical fiber-based telecommunications services.

IT SPECIALIST at Hotelux Oriental Coast Marsa Alam 01/2022 – 12/2022

- Hotel IT Specialist: guest tech support, property systems, network, security, telecom, and upgrades for seamless operations.
